Policy Pathways Beyond the Shoreline

– the report and its effects

Meet

CECILIA LINDBLOM, ÖCKERÖ MUNICIPALITY

Moderated in English by

LUIS SANCHEZ-HERES, RISE

A new OECD-report has arrived, with a focus on evidence-based decision-making for island regions. Outside Gothenburg, in the archipelago, ten islands constitutes the Öckerö municipality. There, the new report – Policy Pathways Beyond the Shoereline – has made an impact, and has become useful for the municipality to plan and form strategies.

In this seminar Cecilia Lindblom, controller at the municipality, will give some insights about how the report has become a tool to advocate, influence and make decisions.

Join the 45-minutes seminar on Teams, [click here](#).
