

MISTRA C2B2 PRESENTS ONLINE BREAKFAST CLUB INNOVATION TALKS

Cybersecurity and the Status of Resiliense

Meet

MIKAEL LAGSTRÖM, DNV CYBER

Moderated in English by

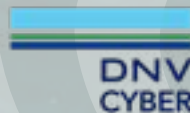

TORSTEN LINDERS, UNIVERSITY OF GOTHENBURG

With AI entering the picture, it has become even more apparent that cybersecurity is an area that requires a great deal of attention. DNV Cyber, a business area within the classification company DNV, has now conducted a major survey looking at how Swedish private individuals, business leaders and people working in government agencies view cybersecurity. The survey also takes a closer look at the maritime sector and ports.

On October 9, Mikael Lagström from DNV Cyber will join C2B2's Online Breakfast Club to tell us more.
